

**SkyScape<sup>®</sup> Architectural Canopies are available in a variety of profiles and styles.** Our hanger-supported canopies enhance the surrounding architecture and can help highlight signage and brand awareness. The support hangers and wall mounting plates can be designed to enhance a facade and lend distinction to any building or storefront. SkyScape canopies are fabricated using extruded aluminum components for unbeatable strength and durability. Capable of withstanding even the harshest weather conditions, they can last years without rusting or corroding. And because our manufactured canopies are welded, not thru-fastened, field installation is simplified to ensure a top-quality product with a fast completion time.
