

**SkyScape<sup>®</sup> Architectural Canopies are available in a variety of profiles and styles.** Our hanger-supported curved canopies in plan can be designed to enhance the surrounding architecture and emphasize an entryway. Featuring a hanger rod design, these canopies can be used in instances where wall support may be limited. SkyScape canopies are fabricated using extruded aluminum components for unbeatable strength and durability. Capable of withstanding even the harshest weather conditions, they can last years without rusting or corroding. And because our manufactured canopies are welded, not thru-fastened, field installation is simplified to ensure a top-quality product with a fast completion time.
